Case Number	New Technology Report Title
LAR-17240-1	Computational Visual Servo:Automatic Measurement and Control for Smart Image
LAR-17327-1	Standardized Radiation Shield Design Method: 2005 HZETRN
LAR-17355-1	A Method of Providing a Synthetic Vision System Flight Management Visualization Display for Aiding Pilot Preview, Rehearsal and/or Review and Real-Time Visual Acquisition of Flight Mission Progress
LAR-17391-1	A Byzantine-Fault Tolerant Self-Stabilizing Protocol for Distributed Clock Synchronization Systems
LAR-17526-1	Adaptive Refinement Tools (ARTs) for Tetrahedral Unstructured Grids
LAR-17609-1	A Self-Stabilizing Byzantine-Fault-Tolerant Clock Synchronization Protocol
LAR-17651-1	Domain Decomposition by the Advancing-Partition Method for Parallel Unstructured Grid Generation
LAR-17656-1	Directed Design of Experiments for Validating Probability of Detection Capability of NDE Systems (DOEPOD)
